

The [Adelaide Airport](#) website contains a section for plane spotters. Like similar sites, it provides information on runway movements, vantage points and the best times of day for spotting.

[Airliners.net](#) is the leading community for discovering and sharing high-quality aviation photography. It has been the largest and most-visited site on the Internet since 1995. The community includes airline management, air travellers, aviation photographers and aviation enthusiasts from every corner of the globe. Currently there are over 22,078 photographers with photos in the Airliners.net database.

[Aviatorsport](#) is a Sydney-based plane spotting YouTube video channel about aviation, aircraft, helicopters, air travel and air shows. It has an extensive library of videos, going back a number of years.

[Plane Spotters | Brisbane Airport](#) is a page of the official website for Brisbane International Airport. It provides support information regarding the best locations and tips for plane spotting for those in for a long session of spotting and photography

There is a group of dedicated enthusiasts who run the blogspot [Central Queensland Spotters](#). This and their associated [Facebook](#) page contains a significant collection of photos taken from airports around Central Queensland. What makes this site interesting is the commentary associated with each aircraft photographed.

Knowing when and where aircraft are arriving at an airport, and which airline it is, is a vital piece of information for plane spotters.

Flightradar24 is a global flight tracking service that provides you with real-time information about thousands of aircraft around the world. Flightradar24 tracks 180,000+ flights from 1,200+ airlines, flying to and from 4,000+ airports around the world in real time. The service is available online for iOS and Android devices.

Perth Airport Spotter's Blog

Greg Wood runs [Perth Airport Spotter's Blog](#), Western Australia's only aircraft movement blog, monitored 24/7 and updated hourly. This blog gives a brief narrative of aircraft arrivals at Perth's two airports.

[Plane Spotters Australia](#) is a Facebook page for two Gold Coast locals who aim to keep you up to date with events in and around the Gold Coast Airport and all major airports in Australia. They aim to keep you in the loop with any unusual arrivals/departures and post photos from their plane spotting around the airport. They aim to be as active as possible and strive to be the most up to date blog.

[SPOTTERGUIDE.NET](#) is the ultimate guide for those passionate about plane spotting. Details of hundreds of airports around the world can be searched from this site. Data provided includes airport information, traffic and runway movements and local tips to maximise spotting opportunities. In addition, a Google map showing the locations of the best vantage points is featured. The current spotter guides for Australian airports include, Adelaide International, Melbourne International, Perth International, Brisbane International, Sydney Kingsford Smith, Darwin Airport and Jandacot Airport. Guidelines are also provided for spotters to establish a spotting guide for airports not yet listed.

You no longer need notepads, pieces of paper or endless lists and spreadsheets of aircraft you have seen. [SpottingLog](#) is a web-based application to keep all of your aircraft spotting logs in one place. The simple software allows you to store trips, aircraft sightings and photos, print trip reports and view other spotters' aircraft sightings.

With three runways, more than 300,000 aircraft movements a year and a wide range of aircraft, Sydney Airport is a great location for plane spotting. Its proximity to the city means that photographers can capture great shots of aircraft with the city, Port Botany or Botany Bay in the background. Sydney Airport officially opened the upgraded Shep's Mound plane spotters' lookout in August 2017, honouring the memory of Bruce Shepherd. The mound features two raised platforms overlooking the airfield, expansive grassed areas, undercover shelter and dedicated car parking. The [Sydney Airport](#) website also has an informational section dedicated to plane spotters.

[Spotters Wiki](#) provides a guide to locations for viewing, spotting, and photographing aircraft at airports around the world. You can sign up for free and you can add, edit and correct information on this site to make sure your local airport information is updated. To find an airport, click on a continent, then a regional sub category.

Victor Pody is a renowned professional, freelance photographer from Melbourne who specialises in aviation photography, having done so since 1995.

He is one of the official corporate photographers at Melbourne International Airport and hence gains access to areas amateur spotters dream of. His award-winning work has been published in many worldwide aviation magazines and printed journals. His photographic skills, eye for a god shot and final products reflects the passion he puts into his profession. His work can be seen on his [website](#) and his Facebook page, [Just Plane Crazy Australia](#), which has a mission to provide high quality images of aircraft to those who have an interest or passion in aviation.

[YBBN Spotters](#) is the Facebook page for aviation photographers who aim to bring you the best high-quality photographs of movements around Brisbane International Airport from photographers featured on [Airliners.net](#) and [Planespotters.net](#)

If you know of other plane spotter groups or resources to support them, please let me know at info@flightsimaus.com.au
